Education

Mahindra University Aug. 2023 – Present
B.Tech, Artificial Intelligence *CGPA: 7.5/10 (till 6th Semester)*

DRS International School (IB Diploma) May 2023
Score: 30/45

Coursework

Courses: Machine Learning, Deep Learning, NLP, Computer Vision, DSA, Linear Algebra, Probability & Statistics
Awards and Achievements:

- 1st Place - Ethical Hacking Hackathon (BITS Hyderabad)
- 5th Place - University Python Assessment
- GenAI Workshop (IITH)
- Authored & presented ***"LegalAssist: A Temporally Aware Retrieval System for Searching Indian Court Judgments"*** at **SSRAAI-CISS 2026**, part of the ETLTC 2026 Summer Series of International Conferences

Skills

Languages & ML: Python, C/C++, PyTorch, TensorFlow, Scikit-learn, CNN–LSTM, Transformers, SBERT
Tools: MERN Stack, HuggingFace, NumPy, Pandas, Git/GitHub, VS Code **Areas**: ML, Deep Learning, NLP, Computer Vision, DSA

Projects

Sepsis Prediction Simulator | *Python, CNN–LSTM, Deep Learning* 2025
- Built a hybrid CNN–LSTM model for clinical time-series prediction with sliding windows, normalization, threshold tuning, and probabilistic risk scoring.
- Integrated the trained model into a web-based real-time inference system for hospital deployment.

Resume–JD Semantic Matcher | *NLP, SBERT, MiniLM, Python* 2025
- Implemented SBERT Bi-Encoder and MiniLM Cross-Encoder for semantic similarity scoring with weighted ensemble ranking to simulate ATS pipelines.

Predictive Maintenance System | *ML, Python, CMAPSS* 2024
- Combined KMeans, Logistic Regression, and Random Forest on CMAPSS sensor data to generate dynamic equipment risk scores for proactive maintenance scheduling.

ResumeScreener | *MERN Stack, NLP, REST APIs* 2025
- Full-stack AI resume screening platform with batch uploads, JD matching, candidate ranking by score, skill-gap analysis, and printable report generation.

Experience

Higher Order AI July 2026 – Aug. 2026
Tester & AI Development Intern
- Led testing of core application workflows using Jest, performing functional and regression testing, identifying defects, and validating backend/API behavior and AI-driven outputs.
- Contributed to AI development and validation by testing model outputs, identifying inconsistencies, and working with the development team to improve the accuracy and reliability of AI-powered risk assessments and reports.

ElectriconWIZ Pvt. Ltd. Nov. 2025 – Present
AI Engineer (Medical AI)
- Building deep learning medical risk prediction systems; handling model experimentation, evaluation, and production integration.

Maker's Lab, Mahindra University Jan. 2025 – March. 2025
Research Assistant
- Researching quantum computing applied to computer vision tasks with hybrid quantum-classical algorithms, implemented in C++.

CYK Solutions June 2025 – Nov. 2025
Lead Developer & Documentation
- Led technical development and structured documentation; handled requirement analysis, lifecycle planning, and deployment workflows.

GaMUverse – Game Lab | *Game Developer & Designer, Founding Team* Feb. 2025 – Present
Co-founded the Game Lab at Mahindra University; designed and developed game systems at the intersection of technology and interactive media.

Hobbies & Interests

Sports: Cricket, Badminton, Hockey, Formula 1, E-sports **Interests:** AI Research, Emerging Technologies, Leadership
